Professional Summary

Senior Software Engineer with 9.8 years of expertise in front-end development, specializing in **Angular (15+), React, JavaScript (ES6+), jQuery, HTML5, CSS3, and Bootstrap**. Proficient in leveraging frameworks like **Kendo UI, DevExpress UI, and Material UI** to craft responsive, user-focused web applications with optimized functionality and performance. Skilled in improving application performance, ensuring cross-browser compatibility, and delivering scalable, high-quality UI designs. Adept at mentoring junior developers, leading teams, and implementing industry best practices to achieve seamless software delivery and enhanced user experiences.

Skills

- **Front-End Development:** HTML5, CSS3 (with Media Queries), JavaScript (ES6+), jQuery
- **UI Frameworks:** Bootstrap, Material UI, Kendo UI, DevExpress UI
- **JavaScript Frameworks:** Angular (15+), React.js, AngularJS
- **Build Tools:** VS Code, Microsoft Visual Studio, Webpack, Grunt
- **Version Control:** Git, GitHub, GitLab, Azure Repos
- **Design Tools:** Adobe XD
- **Methodologies:** Agile, Scrum

Professional Experience

Senior Software Engineer

Infinire Innovative Software Solutions Pvt Ltd – Chennai, India | Jan 2018 – Present

- Developed **responsive** and **reusable components** using **Angular** and **CSS3**, improving website speed and device compatibility.
- Led **UI development** for a dental management system, integrating **Kendo UI** and **DevExpress UI** to enhance user experience.
- Collaborated closely with clients to gather requirements, deliver **tailored solutions**, and provide comprehensive documentation.

UI Developer

Aryu Enterprises Pvt Ltd – Chennai, India | Dec 2016 – Dec 2017

- Developed and optimized **responsive web pages** using **HTML, CSS, and JavaScript**, ensuring **cross-browser compatibility**.
- Focused on delivering high-performance websites, ensuring a seamless user experience across devices.
- Addressed and resolved critical **browser compatibility issues**, reducing support requests and improving user satisfaction.

Education

Bachelor of Engineering in Electronics and Communication

Jayam College of Engineering and Technology, Dharmapuri

2016

Projects

Project #1: OPMS (Ortho Practice Management Service) *is a Unique and innovative orthodontic solutions company catering to the orthodontic community.* The application includes various features such as **patient forms, appointment scheduling, service contract signing, treatment cards, patient text imaging, payment and insurance management, and reporting. It also incorporates **SignalR** for **real-time appointment updates, chat and call features,** and the ability to manage appointment statuses.**

As a **Senior Software Engineer**, I was responsible for

- **Developing the Angular application and setting up the environment.**
- **Leading the UI team** and overseeing the design and layout of the front end.
- Handling **scheduling modules** and **patient appointment signalR updates.**
- Creating **reusable components, including text boxes, text areas, dropdowns, radio buttons, date pickers, time pickers, and spinners** across the entire application.
- Designing reusable **spinner components** based on the layout.
- Integrating and **utilizing Kendo UI and Devexpress controls** for enhanced functionality..
- Managing **front-end design, layout, and API integration**

Tools Used: HTML, CSS, Bootstrap, Angular, Kendo UI, Devexpress UI, REST API, Microsoft SignalR, NgRx

Project #2: OrthoVoIP *is a tailored VoIP phone system designed to enhance communication and patient satisfaction for orthodontic practices.* Created by a doctor experienced in managing private practices and DSOs, it offers flexible, customizable, and reliable solutions. Backed by a dedicated team, OrthoVoIP streamlines operations, supports digital communication, and provides tools to help orthodontic practices thrive.

As a **Senior Software Engineer**, I was responsible for

- **API Integration with Angular** for seamless data communication and functionality.
- Developed **reusable components** for consistent UI elements, including **reports, chat, and SignalR** integration for real-time communication.
- Created a **reusable skeletal spinner** based on layouts for optimized user experience.
- Integrated **follow-up, billing, and fax modules** into the application.
- Led the **front-end design, layout, and API integration** to ensure smooth interaction with backend systems.
- Conducted regular **client calls** to gather **requirements**, ensuring deliverables meet expectations.

Tools Used: HTML, CSS, Bootstrap, Angular, Kendo UI, REST API, Microsoft SignalR

Project #3: Meetstand *is a popular asynchronous meeting tool designed to facilitate communication and collaboration within teams.* It is commonly used for stand-up meetings, but its flexibility allows it to be used for other types of check-ins and updates as well. The tool provides an efficient way for teams to stay connected and updated without needing to sync in real time.

As a **Software Engineer**, I was responsible for

- Set up the project with **React.js** and Created the **layout and design** for the application.
- Handled **API integration** for seamless data exchange.
- Managed **Redux state updates** to maintain consistent app state.
- Created **reusable components** for consistent functionality across the app.
- Implemented **validation using React Hook Form** for form controls and user input to ensure data integrity

Tools Used: HTML, CSS, Bootstrap, React Js, Redux, REST API
